

IN THE SPECIFICATION

Please amend the paragraph appearing at page 106, lines 7-16 as follows:

Reference numeral 554 denotes a spacer for suppressing the deformation of the airtight container against the atmospheric pressure ~~applies~~ applied from outside when the airtight container 556 is made vacuum. The spacer 554 is 0.2 mm in the x direction, 40 mm in the y direction, and 1.2 mm in the z direction, and is fixed on one side with the first glass, which is further identified adjacent the spacer 554 by reference numeral 557 (0.2 mm thick). Figs. 58 and 59 show only three spacers, but there actually are 250 spacers. The front substrate 551, the rear substrate 552, the frame 553, and the spacer 554 are made of soda lime glass.
